

Devika Desai

Business Analytics Graduate Student | Business Analyst | Data Analyst | Authorized to Work in the U.S.

Redmond, WA • 331-255-5519 • deveekadesai27@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

EDUCATION

Seattle University

M.S. Business Analytics

Courses: Database Management, Programming, Machine Learning, Data Visualization

Seattle, WA

(Sep2025 – Mar 2027)

Current GPA – 4.0

Vellore Institute of Technology

M.Tech in Energy & Environmental Engineering

India (June 2020)

CGPA 7.94/10

SKILLS

Programming: SQL, R, Python | **Visualization & BI:** Tableau, Power BI, QGIS | **Data & Analytics Tools:** Excel, MySQL, RStudio, JMP, ESdat | **Version Control & Collaboration:** Git, GitHub

EXPERIENCE

Arcadis

Data Analyst (Graduate Consultant)

India

May 2021- Feb 2023

- **Managed and validated 50+ environmental datasets** using Excel and ESdat, coordinating laboratory data, performing QA/QC, generating statistical and trend analyses to support technical reporting.
- **Leveraged excel power query** to transform historical monitoring datasets, ensuring data compatibility and seamless integration into ESdat for analysis and reporting.
- **Collaborated with project stakeholders** to gather and consolidate spatial data, **developing a QGIS-based dashboard** that supported risk assessments for **300+ UK petroleum sites** and **contributed to a ~40% reduction in project costs**.
- **Enhanced an existing Power BI dashboard** for an oil terminal by retrieving monitoring data from ESdat and adding trend visualizations to support reporting.
- **Mentored 4 colleagues** on data management and ESdat workflows, QGIS dashboards, and environmental reporting.

ACADEMIC PROJECTS

COVID-19 Data Exploration & Analysis | MySQL

- Analyzed **170K+ global COVID-19 records**, performing data quality checks and aggregations to evaluate cases, deaths, infection rates, and vaccination trends across **219 locations**.
- Applied **joins, CTEs, temporary tables, window functions, and views** to integrate deaths and vaccination data and calculate rolling vaccination rates across locations.

Retail Sales Analytics Dashboard | Tableau

- Developed an **interactive Tableau dashboard analyzing \$10.7M in retail sales and 5.6M+ units sold**, with **6 KPIs** and dynamic filters to track revenue, orders, returns, and product performance.
- Identified **monthly and quarterly revenue trends, month-over-month growth, and top-performing products** to generate actionable business insights.

Tokyo Airbnb Revenue Analysis | Python, JMP, Tableau

- Analyzed **27K+ Tokyo Airbnb listings** using Python for data cleaning, missing-value treatment, outlier handling, and feature engineering.
- Conducted **statistical analysis** and developed **Tableau visualizations**, identifying key revenue drivers across property, host, neighborhood, and review characteristics to support **revenue optimization insights**.
- Built and compared **three regression models**, selecting the **log-log model based on model fit and interpretability**, which explained **57.4% of variation in annual revenue**.

AWARDS

- **Awarded Business Excellence – Technical Champion** (twice) for improving data accuracy across multiple projects.
- **Co-authored** research on dye adsorption using graphene oxide, analyzing multivariable experimental data, applying statistical models and generating actionable insights for process optimization [Journal of Environmental Chemical Engineering](#).
