

# Devika Desai

Business Analytics Graduate Student | Business Analyst | Data Analyst | Authorized to Work in the U.S.

Redmond, WA • 331-255-5519 • [deveekadesai27@gmail.com](mailto:deveekadesai27@gmail.com) • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

---

## EDUCATION

### Seattle University

M.S. in Business Analytics

Relevant Courses: Database Systems, Programming, Machine Learning, Data Visualization

Seattle, WA

(Sep 2025 – Mar 2027)

Current GPA - 4.0

### Vellore Institute of Technology

M.Tech in Energy & Environmental Engineering

India (June 2020)

CGPA - 7.94/10

---

## SKILLS

Programming: SQL, R, Python | Visualization & BI: Tableau, Power BI, QGIS | Data & Analytics Tools: Excel, MySQL, RStudio, JMP, ESdat | Version Control & Collaboration: Git, GitHub

---

## EXPERIENCE

### Arcadis

India

#### Data Analyst (Graduate Consultant)

May 2021- Feb 2023

- **Managed and validated 50+ environmental datasets** using Excel and ESdat, coordinating laboratory data, performing QA/QC, generating statistical and trend analyses to support technical reporting.
- **Leveraged excel power query** to transform historical monitoring datasets, ensuring data compatibility and seamless integration into ESdat for analysis and reporting.
- **Collaborated with project stakeholders** to gather and consolidate spatial data, **developing a QGIS-based dashboard** that supported risk assessments for **300+ UK petroleum sites** and contributed to a **~40% reduction in project costs**.
- **Enhanced an existing Power BI dashboard** for an oil terminal by retrieving monitoring data from ESdat and adding trend visualizations to support reporting.
- **Mentored 4 colleagues** on data management and ESdat workflows, QGIS dashboards, and environmental reporting.

---

## ACADEMIC PROJECTS

### COVID-19 Data Exploration & Analysis | MySQL | [GitHub](#)

- Analyzed **170K+ global COVID-19 records**, performing data quality checks and aggregations to evaluate cases, deaths, infection rates, and vaccination trends across **219 locations**.
- Applied **joins, CTEs, temporary tables, window functions, and views** to integrate deaths and vaccination data and calculate rolling vaccination rates across locations.

### YouTube Recommendation Performance Dashboard | Python, Power BI | [GitHub](#) | [Live Dashboard](#)

- Built an end-to-end Python pipeline to clean and analyze **1M synthetic user-video interactions**, engineering features for quarterly trends, video length, content category, device, and viewing time.
- Developed and published an interactive **Power BI dashboard with 6 KPIs and 4 slicers** to analyze recommendation CTR, subscription conversion, watch completion, segment variance, and quarterly trends.
- Automated rule-based performance summaries and hover insights to identify high-performing segments, engagement risks, and recommended areas for business testing.

### Tokyo Airbnb Revenue Analysis | Python, JMP, Tableau | [GitHub](#)

- Analyzed **27K+ Tokyo Airbnb listings** using Python for data cleaning, missing-value treatment, outlier handling, and feature engineering.
- Conducted **statistical analysis** and developed **tableau visualizations**, identifying key revenue drivers across property, host, neighborhood, and review characteristics to support **revenue optimization insights**.
- Built and compared **three regression models**, selecting the **log-log model based on model fit and interpretability**, which explained **57.4% of variation in annual revenue**.

---

## AWARDS

- **Awarded Business Excellence – Technical Champion** (twice) for improving data accuracy across multiple projects.
- **Co-authored peer reviewed** research on dye adsorption using graphene oxide, analyzing multivariable experimental data and applying statistical models to support process optimization ([Journal of Environmental Chemical Engineering](#)).
